

## TELEMANAGEMENT TECHNOLOGIES, INC.

TeleManagement Technologies, Inc. (TTI) was founded 22 years ago with a mission to help companies better manage and control their communications services and expenses.

Throughout their years of experience, they have saved companies millions of dollars through automated telecom invoice processing, billing error detection and expense allocation. They have installed systems in all industries; Retail, Healthcare, Insurance, Manufacturing, Government and more. TTI Clients are using their tools to process as little as \$150,000 per month to as much as \$15 million per month.

The WinBill system was first released in 1996 and has proven to be the most robust and flexible system with all the capabilities of systems costing hundreds of thousands more. When asked what differentiates TTI from other vendors President Mark Hearn states, "With a product that has been developed and enhanced over 13 years, we have priced our offerings at a reasonable level yet WinBill has all the bells and whistles of other higher priced vendors, all backed by a knowledgeable and client recommended support staff. TTI provides the best in VALUE and SERVICE."

The WinBill application comes complete with Order Desk & Provisioning, 250 Unique Vendor Import File capabilities including EDI, CD, Web and other billing media, Full Automated Audit, Contract Compliance Validation and Alerting, LDAP/HR Integration, Robust Billing and Circuit Inventory, Scanned Image Viewing, Complete Business Analytics and Exception Reporting, Wireless Management and much more. Industry experts and consultants agree, WinBill offers more flexibility, features and reporting than any other TEM Solutions. Developed by Telecom Consultants for complete Telecommunications Inventory and Expense Management – WinBill offers the best value in the marketplace.

Contact TTI for a free 60 minute evaluation/consultation of your business needs and see why WinBill is perhaps the best kept secret in the TEM Marketplace.
